

## Printing to Local Printers in Avalon Appstream

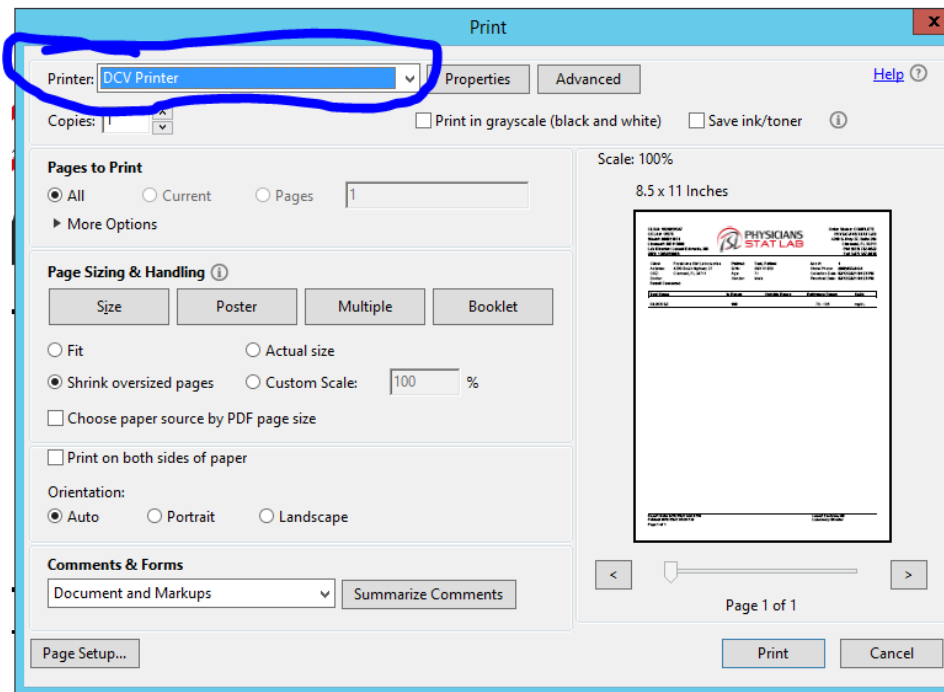

In Avalon Appstream you can print to local printers by utilizing the DCV Printer.

To print to the DCV Printer, simply select it from your print menu.

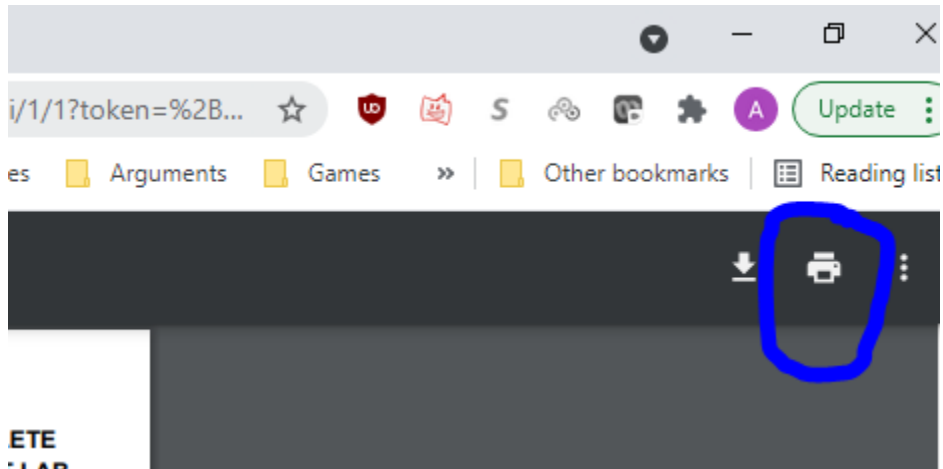

1. Click the Print button on the document you want to print.

2. Select the DCV Printer

3. The Document will then print to your browser. If you are using google chrome you can click the print button in the top right of the screen and it will allow you to print to your local printers.

4. Select your local printer to print to and click Print.
